WEEK 1 · LESSON 6 OF 24 · HANDOUT

Week 1 Project: Map the AI Around You

Study time: **about 60 minutes** (reading, video and activity)

▶ **Watch:** https://www.youtube.com/watch?v=0yCJMt9Mx9c — open the lesson online to watch inside the course.

Your goal in this lesson: Apply Week 1 ideas by identifying, explaining and evaluating real AI uses in your daily life and chosen field.

Your project

This week you learned what AI is, how it learns, how generative AI works, where it fails, and how it is used in Rwanda and Africa. Now you will put it together in a short **AI Map** — a one- to two-page document you can keep in your portfolio.

What to produce

Part A — AI in my day (5 examples). For each example, write:

AI use	What it learned from (data)	What it predicts or creates	One risk or limitation
e.g. Phone keyboard	Millions of typed messages	The next word	Suggests wrong words in Kinyarwanda

Part B — AI in my field (3 examples). Choose your field of study or work. For each example, explain: the problem it solves, who benefits, and what human checking is still needed.

Part C — One honest test. Ask an AI assistant one real question from your field. Paste the question, summarise the answer, and mark which parts were correct, which needed checking, and which were wrong.

Part D — Reflection (100–150 words). What surprised you most this week? Where will you use AI next week, and where will you not use it?

How you will be assessed (self-check)

- ☐ I gave 5 everyday examples with data, output and a risk for each.
- ☐ I gave 3 examples from my field with benefits and human checks.
- ☐ I tested an AI tool honestly and verified its answer.
- ☐ My reflection uses at least three terms from Week 1 (model, data, hallucination, bias, LLM…).
- ☐ My work is written in my own words.

Remember this: Seeing AI clearly — what it learns from, what it produces and where it fails — is the foundation for using it well.

Name: _____ Date: _____

Activity

Task 1

Complete Parts A–D using the worksheet in this lesson's PDF. Save your finished AI Map: you will reuse it in your Week 4 portfolio. When you are done, mark this lesson complete to move to Week 2.
