WEEK 4 · LESSON 22 OF 24 · HANDOUT

# Building Your AI-Augmented Career

Study time: **about 45 minutes** (reading, video and activity)

▶ **Watch:** https://www.youtube.com/watch?v=zd4ALKv8Das — open the lesson online to watch inside the course.

**Your goal in this lesson:** Build a simple portfolio and online presence that show your AI skills honestly, and talk about them confidently in applications and interviews.

## Show, don't just say

Writing "skilled in AI" on a CV means little. Employers want **evidence**: what did you do, how, and what changed? The good news: your projects in this course are exactly that evidence.

## Your AI portfolio

A portfolio can be a simple Google Doc, a Notion page, a PDF or a personal website. Include 3–5 pieces:

| Piece | From this course |
|---|---|
| AI Map of your field | Week 1 project |
| Prompt library (selected prompts) | Week 2 project |
| Before-and-after automation case study | Week 3 project |
| A presentation you built with AI help | Lesson 16 |
| Your certificate | Final project |

For each piece write: **the problem, what you did, the tools you used, what you checked, and the result.**

## Your CV and LinkedIn

- Add a **skills** line that is specific: *"AI-assisted research and writing (ChatGPT, NotebookLM); spreadsheet automation with AI-generated formulas; responsible AI use."*
- Add **results** to experience: *"Reduced weekly report preparation time from 3 hours to 1 hour using an AI-assisted workflow with human verification."* — only if it is true.
- Add your **WAMUGII certificate** under Licenses & Certifications on LinkedIn.
- Write a short **About** section: who you are, your field, and how you use technology to solve problems.
- Share one short post about what you learned or built — it shows initiative and helps people find you.

## Talking about AI in interviews

Use the **STAR** method: **S**ituation, **T**ask, **A**ction, **R**esult.

> *Situation: Our club spent hours on weekly meeting notes. Task: I was responsible for minutes. Action: I recorded the key points, used an AI assistant to draft structured minutes from my notes, and checked every decision and*

> *name. Result: Minutes were ready the same day and took 30 minutes instead of 2 hours.*

Always mention **how you checked the AI's work** — it shows maturity and judgement.

## Honesty is your brand

Never claim AI skills, certificates or results you do not have. A small, true example is more convincing than a big, vague claim — and it survives follow-up questions.

**Remember this:** Turn your course projects into a simple portfolio, describe real results with STAR, and always show how you checked the AI.

Name: _____ Date: _____

## Activity

### Task 1

Create your portfolio document with at least 3 pieces from this course.

### Task 2

Update your CV skills line and add one true, measurable result.

### Task 3

Update your LinkedIn profile: headline, About section and skills (add your certificate when you finish).

### Task 4

Write one STAR story about using AI responsibly and practise saying it aloud in under 90 seconds.

## Self-check

Think about your answers here, then take the quiz online — it is marked instantly and explains every answer.

1. Why is 'skilled in AI' on a CV weak on its own?
   - A. It is too long
   - B. It must be written in French
   - C. AI skills are not valued
   - D. Employers want evidence of what you did and the result
2. Which CV line is strongest (assuming it is true)?
   - A. Reduced weekly report time from 3 hours to 1 hour using an AI-assisted workflow with human checking.
   - B. AI expert.
   - C. Knows ChatGPT.
   - D. Good with computers.
3. What does STAR stand for?
   - A. Skill, Talent, Ability, Role
   - B. Situation, Task, Action, Result
   - C. Start, Try, Act, Repeat
   - D. Study, Test, Apply, Review
4. What should you ALWAYS mention when describing your AI work in an interview?
   - A. How fast your laptop is
   - B. Which AI is the most famous
   - C. How you checked the AI's work
   - D. That AI did everything
5. What should each portfolio piece include?
   - A. Only a screenshot
   - B. The problem, what you did, tools used, what you checked, and the result
   - C. Your password
   - D. Just the tool name
6. Why is honesty about AI skills so important?
   - A. It is not important
   - B. Certificates are optional
   - C. Employers never check
   - D. Small true examples convince better and survive follow-up questions
