WEEK 2 · LESSON 12 OF 24 · HANDOUT

Week 2 Project: Build Your Prompt Library

Study time: **about 60 minutes** (reading, video and activity)

Your goal in this lesson: Create a personal, tested library of reusable prompts for your study or work, applying Role-Task-Context-Format, advanced techniques and verification.

Your project

A **prompt library** is a document of your best, tested prompts — ready to copy, fill in and use. Professionals who use AI well almost always keep one. By the end of this project you will have **10 prompts** that save you time every week.

What to produce

For each of your 10 prompts, record:

Field	What to write
Name	e.g. "Polite deadline-extension email"
When I use it	The situation it is for
Prompt template	The full prompt with [blanks] to fill in
Technique used	R-T-C-F, few-shot, step-by-step, interview, critique, chain
Tested result	One sentence: how well it worked
What to check	The facts or parts you must verify each time

Requirements

- At least **3 different areas**: for example study, communication and planning — or your own job tasks.
- At least **one prompt** for each technique: R-T-C-F, few-shot (examples), step-by-step, interview-me, and critique-and-improve.
- Every prompt **actually tested** at least once.
- At least **one prompt** that asks the AI to work only from a document you provide.

Ideas to get you started

- Turning lecture notes into a one-page revision sheet with 5 practice questions.
- Writing a professional email in English or French from rough notes.
- Planning a week of study around your deadlines.
- Preparing for an interview: "Ask me 10 likely questions for a [job] role, one at a time, and give feedback on my answers."
- Summarising a long document for a busy manager.

Self-check

- ☐ 10 prompts, each tested.
- ☐ All five techniques used at least once.
- ☐ Each prompt lists what must be checked.
- ☐ No personal or confidential information inside the templates.

Remember this: A tested prompt library turns AI from an occasional trick into a reliable everyday tool.

Name: _____ Date: _____

Activity

Task 1

Use the worksheet in this lesson's PDF to build your library. Store the final version somewhere you can reach from your phone and computer — a Google Doc, a notes app or OneNote. Mark this lesson complete when your 10 prompts are tested.
