WEEK 3 · LESSON 16 OF 24 · HANDOUT

AI for Presentations, Design and Content

Study time: **about 45 minutes** (reading, video and activity)

Your goal in this lesson: Use AI to plan presentations, create slides and visuals, and produce social-media content — with good design habits and honest use of images.

Presentations: start with the story

Most weak presentations have too many words and no clear message. Use AI to plan the **story first**, then the slides.

> *"I have 10 minutes to present my project on reducing food waste at our university canteen to the administration. Suggest a structure of 7 slides: title, problem, evidence, solution, cost, benefits, next steps. For each slide give a headline and 3 short points."*

Then build the slides yourself or with an AI slide tool (Gamma, Canva, Copilot in PowerPoint or Gemini in Google Slides).

Good slide habits

- **One idea per slide**, with a headline that states the point ("Food waste costs 2 million RWF a term"), not just a topic ("Food waste").
- **Few words** — your voice explains; the slide supports.
- **A clear visual** — a chart, a photo or a simple diagram.
- **Check every number** the AI put on a slide.

Ask AI for **speaker notes** and practice questions: *"Write speaker notes for each slide and list 5 tough questions the audience might ask, with short answers."*

Visuals and images

- AI design tools such as **Canva** can suggest layouts, resize designs for different platforms and generate images from a description.
- Describe images clearly: subject, setting, style, colours. *"A flat illustration of young Rwandan entrepreneurs working on laptops in a bright co-working space, teal and purple colours."*
- **Do not** create fake photos of real people or events, or images that could mislead. Label AI images where it matters.
- Respect copyright and brand logos — do not copy other people's work.

Social-media content

AI can help you plan and write content for a business, club or personal brand:

- *"Create a 2-week content calendar for a small bakery in Remera: 3 posts per week, mix of products, tips and customer stories."*
- *"Write 3 caption options for this post, friendly tone, under 40 words, with a call to action."*

Keep it real: use your own photos where possible, reply to people yourself, and never post fake reviews.

Remember this: Plan the story first, keep slides simple and honest, and use AI visuals responsibly.

Name: _____ Date: _____

Activity

Task 1

Choose a topic you could present (your project, your business idea or a subject you are studying).

Task 2

Ask AI for a 6–8 slide structure with headlines and speaker notes.

Task 3

Build at least 4 slides in Canva, Google Slides or PowerPoint, with one AI-assisted visual.

Task 4

Ask AI for 5 likely audience questions and prepare your answers.

Self-check

Think about your answers here, then take the quiz online — it is marked instantly and explains every answer.

1. What should you plan FIRST when making a presentation with AI?
   - A. The animations
   - B. The colours
   - C. The story and structure
   - D. The font size
2. Which slide headline is better?
   - A. Information
   - B. Food waste costs 2 million RWF a term
   - C. Food waste
   - D. Slide 3
3. Which is an IRRESPONSIBLE use of AI images?
   - A. Generating background patterns
   - B. A flat illustration for a poster
   - C. Resizing a design for Instagram
   - D. Creating a fake photo of a real person at an event that never happened
4. What can AI write to help you rehearse a presentation?
   - A. Your bank details
   - B. Speaker notes and likely audience questions
   - C. Fake reviews
   - D. Your exam results
5. Which is a good slide habit?
   - A. Use ten fonts
   - B. One idea per slide with a clear visual
   - C. Avoid any images
   - D. Put every word you will say on the slide
6. When using AI for business social media, what should you NEVER do?
   - A. Post fake customer reviews
   - B. Write caption options
   - C. Plan a content calendar
   - D. Use your own photos
