WEEK 3 · LESSON 18 OF 24 · HANDOUT

Week 3 Project: Automate a Real Task

Study time: **about 75 minutes** (reading, video and activity)

Your goal in this lesson: Choose a real, repetitive task, redesign it with AI, measure the before-and-after result, and present it clearly.

Your project

This week you used AI for writing, research, spreadsheets, presentations and your own field. Now you will prove the value with **one real improvement** — the kind of result you can talk about in an interview.

Step by step

1. Choose the task. Pick something real and repetitive from your study, work, business or community group: weekly reports, customer replies, meeting minutes, revision notes, a sales summary, lesson materials.

2. Measure "before". Do the task the normal way once and record: time taken, steps, and quality problems.

3. Redesign with AI. Write the workflow: - which steps AI does (with your prompt templates); - which steps you do (checking, deciding, personal details); - what you verify every time.

4. Measure "after". Do the same task with your new workflow and record time and quality.

5. Present it. Make a one-page summary or 4–5 slides:

Section	Content
The task	What it is and why it matters
Before	Time, steps, problems
New workflow	AI steps + human steps + checks
After	Time saved, quality changes
Lessons	What worked, what did not, what you will improve

Rules

- Use made-up or anonymised data for anything personal or confidential.
- Be honest about results — a small, real improvement beats a big, invented one.
- Include at least one mistake AI made and how you caught it.

Self-check

- ☐ A real, repetitive task.
- ☐ Before and after measured.
- ☐ Clear split between AI steps and human steps.
- ☐ At least one AI mistake caught and explained.

- ☐ Presented in one page or 4–5 slides.

Remember this: Real, measured improvements are the best proof that you can use AI professionally.

Name: _____ Date: _____

Activity

Task 1

Complete the five steps using the worksheet in this lesson's PDF. Keep your final summary — it becomes a portfolio piece in Week 4. Mark the lesson complete when you are done.
